

Akfix 610 is a single component, fast curing polyurethane adhesive. It combines high bond strength with fast curing. It's suitable for bonding almost all common building materials.

610 EXPRESS PU MONTAGE ADHESIVE

Transparent

Just 15 Minutes

Waterproof

It can be used for bonding various kinds of construction materials such as

WOOD

METAL

CONCRETE

MDF

MARBLE

GRANITE

GLASS & CERAMIC

PVC

High Bonding Strength

EXPRESS PU MONTAGE ADHESIVE 610

All Surfaces & All Materials

Akfix
610
 EXPRESS PU MONTAGE ADHESIVE
 Reaches ultimate power within minutes

D4 TRANSPARENT **15 MIN.**

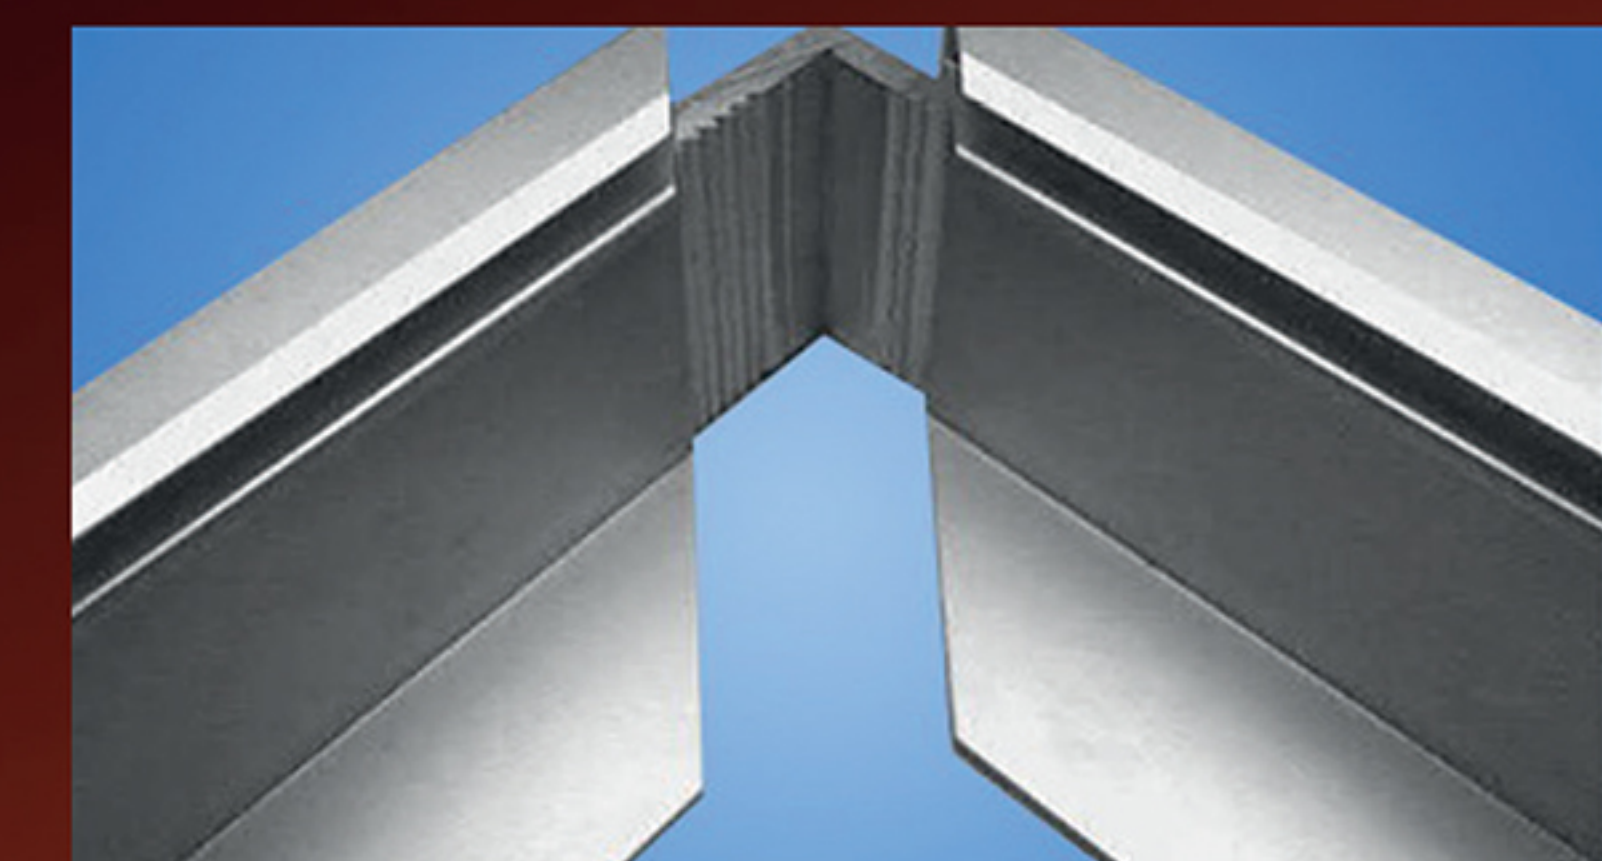

Extremely high bond strength on numerous substrates

WOOD, MDF, CONCRETE, METAL, POLYSTYRENE, POLYURETHANE, PVC, MARBLE, GRANITE, STONE, POLYCARBONATE, GLASS, CERAMIC etc.

www.akfix.com

PROPERTIES

- Fast curing • Low press time • Transparent • Extremely high bond strength on numerous substrates • Thixotropic, non-sag, ideal for vertical joints • Low consumption, economical • Good filling properties • Conforms to D4 according to DIN EN 204 • Easy to use • Very good resistance to chemicals • Excellent resistance to moisture and weather conditions • Nonshrinking • Low odour • Usable on slightly wet substrates

APPLICATIONS

It is ideal for construction and repair applications where permanently strong adhesion is required between porous-porous and porous-nonporous surfaces. Suitable for construction materials such as wood, MDF, concrete, metal, polystyrene and polyurethane foam, marble, granite, ceramic etc.
